PROFESSIONAL SUMMARY

Undergraduate engineering student with strong technical foundations in **Python, SQL, Data Analytics**, and **Software Development**. Experienced in processing multi-dimensional telemetry datasets, writing complex SQL queries, designing automated data extraction pipelines, and applying statistical analysis using Pandas and NumPy. Proven capability in data validation, forensic technology simulation, and event-driven automation. Seeking a **Data Analyst / Software Engineering / Data Operations Internship**.

EDUCATION

Bangalore Institute of Technology

Bengaluru, India

Bachelor of Engineering in Electronics & Telecommunication Engineering

2023 – 2027

CGPA: **7.64 / 10.0** | **Relevant Coursework:** DBMS, Data Structures, OOP, Data Analysis, Computer Networks, OS basics.

BLDEA's Sri B M Patil PU College

Vijayapur, India

Pre-University Course (PCMC) – **94.3%** | Class X – **90.88%**

2021 – 2023

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, C++, C, JavaScript/HTML basics.
- **Data Analytics & Libraries:** Pandas, NumPy, Matplotlib, Data Cleaning, EDA, Statistical Modeling, Time-Series.
- **Databases & Querying:** Relational Databases, PostgreSQL, MySQL, SQLite, Complex Joins, Aggregations, Indexing.
- **Data Operations & Tools:** Advanced Excel (Pivot Tables, VLOOKUP, Data Modeling), Git, GitHub, VS Code, Linux/Bash, LaTeX.
- **Software Engineering:** Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs, Automation Scripts.

TECHNICAL & DATA PROJECTS

IoT Time-Series Telemetry & Power Data Analytics Engine | Python, Pandas, NumPy

01/2026 – Present

- Developed a data acquisition framework to process continuous power telemetry across dual voltage states and 4 clock frequencies (40 MHz to 240 MHz).
- Engineered automated data cleaning pipelines in Python to structure raw logs into normalized datasets for exploratory data analysis.
- Evaluated energy consumption trade-offs ($P \propto V^2 \cdot f$), producing structured training data matrices to support future ML optimization.

Vehicular Geospatial Streaming Pipeline & Incident Logger | C++, Embedded Logic, GPS/LTE

08/2025 – 12/2025

- Engineered an incident data pipeline processing streaming 6-axis kinematic data and raw GPS NMEA sentence streams under real-time constraints.
- Implemented algorithmic vector magnitude parsing ($\sqrt{x^2 + y^2 + z^2}$) to filter operational noise and classify critical collision anomalies at $2.5g$ in < 100 ms.
- Automated telemetry reporting via 4G LTE AT commands, extracting precise geospatial coordinates and dispatching emergency location payloads in < 8 seconds.

Forensic Data Analysis & Anomaly Investigation | Deloitte Job Simulation (Forage)

07/2026

- Conducted forensic data analysis on large relational tables to identify transaction anomalies, fraudulent patterns, and data discrepancies.
- Formulated complex SQL queries utilizing multi-table joins, subqueries, and window functions to extract audit trails and validate data integrity.
- Synthesized quantitative findings into structured executive summaries and analytical dashboards to communicate risk metrics to stakeholders.

CERTIFICATIONS

- **SQL and Relational Databases 101** – IBM Cognitive Class
- **Python Essentials 1** – Cisco Networking Academy
- **Data Analytics Job Simulation** – Deloitte (Forage): Data Analysis & Forensic Technology
- **Getting Started with Artificial Intelligence** – IBM SkillsBuild
- **Introduction to Cybersecurity** – Cisco Networking Academy

LEADERSHIP & CO-CURRICULAR ACTIVITIES

- **President, Telecommunication Engineering Students Association (TESA):** Led departmental operations, managed student database registrations, and directed logistics for **INCEPTRA 2026** (National Ideathon and Poster Competition).
